

NJ 2-1-1 connects people in need, with services that can help.

Above and Beyond I & R

Since 2005, NJ 211 has been working closely with government, non-profit and faith-based partners to connect people to the help they need. We do more than “patch people through” to existing resources. 211 specialists are trained to identify and address root causes of a client’s problem – and connect them with a wide range of available resources that meet all the underlying needs, not just the one that prompted the call, text or email.

Sometimes we go further than that – Above and Beyond I & R. Through Special Initiatives and Hotlines NJ 211 plays a pivotal role that leads to improved efficiencies in programs and services, creating impactful changes that improve lives.
